

## Ditec Gol4 Coding Instructions

- 1) Go to within approx. 3 metres of control box.
- 2) On the remote control that is ALREADY working the gate on the front beside the word DITEC, for the old style BIX LP2 - green remote is a small hole, for the new GOL4 remotes the hole is located in the center of the 4 buttons. Put a paper clip into this hole to press a small button in the hole and when you see the red light come on on the remote remove the paper clip
- 3) Within 10 seconds press any button down once only on the new remote and release
- 4) Wait for approximately 10 seconds
- 5) Your new remote will now be programmed in
